

**Effective Date: April 1, 2010**

Sage KnowledgeSync is available in two editions; Professional and Enterprise. Both include the ability to monitor the conditions in a single application database. (Referred to as "One-Connection".)

The Professional Edition allows a client to send out email alerts for up to 24 different alert scenarios, chosen from the list of events that come with KnowledgeSync. Some customization is allowed.

The Enterprise Edition allows a client to send out alerts via any method, for an unlimited number of alert scenarios. Full event customization options are included.

If a client wishes to monitor conditions in more than one application database, they may "add connections". Monitoring the content of Incoming Email requires a connection, as does monitoring the Operating System. Clients may also purchase an "Unlimited Connection" license.

<b>License Type</b>	<b>License Cost</b>	<b>Annual M&amp;S Cost (required 1<sup>st</sup> year)</b>
